DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 18-20 and 22-34 are allowed over the prior art of record.

Independent claim 18 is allowed since the claim recites a method for recording data by means of an array of micro-tips arranged in a plane facing a memory support including a stack of thin layers with at least one deformable memory layer, the method comprising: data recording by selective actuation of the micro-tips, the micro-tips being fixed directly onto one and the same support substrate; bringing the array of micro-tips and the memory support into contact with a predetermined pressure, which is insufficient to cause a deformation representative of a data to be recorded, before the selective actuation of the micro-tips for data recording, said pressure enabling the dispersion of heights of the micro-tips of the array of micro-tips to be absorbed by the deformable memory layer.

Claims 19 and 20 are allowed as being dependent upon aforementioned independent claim 18.

Independent claim 22 is allowed since the claims recites a recording device for implementation of the method according to claim 18, comprising: means for absorbing

Art Unit: 2627

the dispersion of the heights of the micro-tips of the array; and means for recording by the selective actuation of the micro-tips, wherein the deformable memory layer constitutes said means for absorbing when the memory support and the array of micro-tips are brought into contact, at said predetermined pressure, which is insufficient to cause a deformation representative of a data to be recorded, the micro-tips, having an apex of nanometric dimension, being fixed directly onto one and the same support substrate.

Claims 23-34 are allowed as being dependent upon aforementioned independent claim 22.

The closest prior art by Chen et al (hereinafter Chen – USPN 6542400) discloses an array of micro-tips that are affixed to a substrate with individual actuators to ensure that each probe tip maintains contact with the recording medium. Chen does not disclose that the probe tips are affixed directly to the support substrate or that a predetermined pressure is imposed on the entire array of probe tips in order to maintain contact with the recording medium without causing a deformation in the recording medium.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Chen et al. (USPN 7002820) discloses an array of micro-tips that are affixed to a substrate with individual actuators to ensure that each probe tip maintains contact with the recording medium.

Art Unit: 2627
